CRISIS IN CALL LOANS

ONLY SMALL OFFERINGS AND RATES ADVANCED TO 100 PER CENT.

Bankers Anticipate Further Trouble Before Next Wednesday-Local Markets Neglected.

At New York yesterday money on call was very stringent at 10@100 per cent.; last loan, 80: closed, 80, Prime mercantile paper, nominally, 71/2

@10 per cent. Sterling exchange was strong, with actual business in bankers' bills at \$4.84\2014.85 for demand and \$4.811/2@4.82 for sixty days; posted rates, \$4.8274.821/2 and \$4.851/2; com-

mercial bills, \$4.801/2. Bar silver, 64%c; silver certificates, 65% 651/2c. Bar silver at London, 29 13-16d per

Total sales of stocks were 232,171 shares including the following: American Tobacco. 4,400; American Sugar, 45,900; Burling-Quincy, 22,000; Chicago Gas, Louisville & Nashville, 10 .-14.600: 400; Manhattan Consolidated, 6,800; Reading, 17,500; Rock Island, 4,300; St. Paul, 35 .-500; Tennessee Coal and Iron, 5,100; Union Pacific, 4,600; Southern railroad preferred,

4,300; silver certificates, \$24,000. The course of the New York stock market yesterday was dominated by extreme stringency in the rates for call money, the extreme high point touched being 1/4 per cent. per day plus 6 per cent. interest, or almost equivalent to 100 per cent. per annum. The lowest point was 10 per cent., early in the day, and the crosing was at 80 per cent. Even at the high points the offerings of funds were not large, the supply coming chiefly from the lenders of forheavy demand for accommodations in the next few days. The Nov. 1 interest and dividend disbursements are fairly large and

that date falls on Sunday. The banks can-not call loans that are made Saturday and loans made to-day go over to Monday. Then again loans made on Monday must carry over until Wednesday. The flurry occas-ioned revived rumors of the probable issue known that such a step will not be taken except as a last resource and the present stringency is not expected to last more than a few days. This stringency is confined to Wall street and it is understood that the needs of the dry goods and other merchants are being supplied at 6 per cent, by their commission banks. Money is be-ing drawn out of the banks to the extent that legal tenders can be secured. A feature of the day yesterday was the calling and shifting of loans and some of the money disturbed was reloaned in the street at the high rates. An increased demand for cash gold and a slight advance in the premium or "commission" by bullion dealers was also noted. Some apprehension is expressed that further stringency in money expressed that further stringency in money rates may occur to-day. There is practically no short time money obtainable. In one instance 60 per cent. was paid for a five-day loan expiring Nov. 4 on a loan of \$100,-000. The stock market steadied slightly from time to time on covering of shorts, but the trend was downward and the closing at the lowest of the day. The more extreme declines included 2½ in St. Paul preferred; Sugar, Rock Island and Lake Shore, 2½; St. Paul, 2½; Kansas & Texas preferred, 2; Burlington, Delaware & Hudson and Manhattan, 1½; Denver preferred, 1½; Louisville & Nashville, 1¾, and 1½ per cent. in Reading and Western Union. In the specialties Lacleade Gas broke 3 per cent. on liquidation. Aside from the activity ity in money the general market was un-favorably affected by the uneasiness in the foreign financial centers regarding the depression in Kaffir gold mining shares and apprehensions of tight money. The Burlington September statement, showing a decrease of \$107,534 in net earnings and a decrease of \$114,580 in expenses, although less

tion of the long-continued injunction re-straining the payment of dividends upon the Fidelity Trust receipts for the stock of the companies. Subsequently the stock reacted in sympathy with the depression in the general list. The market left off Railroad bonds reacted sharply in sympathy with the depression in the stock market, with the Reading and Atchison is-sues scoring extreme declines of 1@2 per cent. on increased dealings. The sales were

unfavorable than had been expected, increased the depression in the grangers. Chicago Gas rallied 2½ per cent. from the

carly loss on the reported judicial modifica-tion of the long-continued injunction re-

Government bonds declined sharp frac-tions on sales of \$41,500, Silver certificates irregular, but closed ½ per cent. higher on dealings of \$40,000 dealings of \$24,000. The following table, prepared by L. W. Louis,

Drilling Operations Falling Off Owing to Reduced Prices Controlled by Standard Oil Company.

Special to the Indianapolis Journal.

MONTPELIER, Ind., Oct. 29 .- The great Indiana oil field, like the Ohio field, shows a decrease in completed work for October. This was expected and looked for, owing to the fact that the price of drilling has in tery. There still remains plenty of money cost less money than in Ohio or in the Eastern fields. The wells are as good in | 26,000 head. this State as in any other. So far no great gushers have been drilled in the State, but they are yet to come. This State will in ing of some wonderful gushers, like the famous McMurray, Kirkbride, McHollister, Mercer, Dukat, Niece and many others in the Ohio field. All of these gushers were surrounded by light wells or dry holes. In the Camden pool in Jay county, this State, is some of the same kind of territory, and Lard-Dec. many good wells were completed in the Ribs-Dec. pool. The first well completed on the Hanner of Pena township, Jay county, is one of the most wonderful acting wells ever completed in the United States. This well barrels of oil and 1,500 barrels of salt water. Within forty days from the time the well was finished it was doing but little water and 1,400 barrels of oil. In this same pool at least five hundred wells were finished, but none of them equaled the famous Harris Well No. 7, on the McCollister farm, near the hamlet of Nottingham, did 120 barrels an hour, and without doubt is the largest well ever completed in the State. More of this kind are looked for right in the heart of the gas belt. The gas terri-tory will gradually go to oil as the gas pressure works off from the Trenton rock. The Indiana field bids fair to extend from Bluffton to the extreme southeast corner of the State, and there connect with the coming fields of the South. The Standard has evidently stopped operations for the time being, or until the Cudahy pipe line is completed, and then they will go in for fight with the new concern. It is hoped that the new line will prove a success, as it will without a doubt be a great thing for the field. In Ohio the Standard has everything its own way, with the exception of a few smaller concerns that are using oil sufficient for their refineries. Department Clerk's Influence. littsburg Chronicle-Telegraph. Let no one doubt the influence of Washington department clerks in this election. An authentic story is told at Republican headquarters of a party manager from a fur West town, who had been doing several votes. It was a Republican family, but free silver had made inroads. and the managers could find no means of heading off this tendency with argument or appeal. Finally a young scion of the family was learned to be in the depart-ments at Washington, and "sound" on the money question. A letter was straightway penned a manager in this city to see him and secure his influence. The department clerk complied, and wrote home a stirring appeal to support the St. Louis candidates. The latest advice is that the aged father, an uncle and his son-in-law have been won back to the fold and that three more votes are assured for McKin-ley. This is cited as an example of the thorough campaign Republicans have been

WHEAT AGAIN HIGHER

STRENGTH IN FOREIGN MARKET CAUSED AN ADVANCE OF 1 1-8C.

Rapid Fluctuations, the Leading Ce real at One Time Touching 73 1-4e -Pork Unchanged.

CHICAGO, Oct. 29 .- The exceeding great trength of the foreign wheat markets at their opening to-day and again as they of about 14c per bu. The gain at one time was 21/2c per bu, but money in New York, which was tightened to the very verge of strangulation, caused the reaction. Corn, oats and provisions were dull, without material change in value. The ballish whirl which wheat experi-

enced yesterday afternoon was the mere

raising of the dust by the preliminary gusts of wind which precede a hurricane. The 24c rise of the previous day was increased in the course of the first fifteen minutes to-day by the addition of another 24c. December, which closed on the day before at 70% @70%c, sold as high as 73c in the time named. The rush of the buyers at the start was such that sellers easily secured from 71%c to 72c at the first brush in the pit, and many got at least %c above the lower of those two prices. In ten minutes the price had risen to 73c, and furnished by Theo. Stein, abstracter of titles, after reacting to 721/2c, it rose to 731/4c. From the latter point there was a more serious decline than the first. The sudden bulge led to some suspicion that the hand of the manipulator was on the lever which controlled the movement. But there were other considerations which had much influence. The Liverpool cable was higher. There were private cablegrams confirming the bad crop situation in India and Australia and noting additional sales of cargoes to go to those countries. New York wired that foreigners were active buyers there at the opening and that the exporting houses which had large accept-ances last night on cable offers were also buying freely. But the pace got too hot. Realizing started, and the accumulated bearish news, which had been lost sight of in the general hurrah, began to have its effect. Minneapolis and Duiath received 1,221 carloads of wheat, compared with 1,-090 Thursday last and 1,136 cars a year ago. That kind of movement repeated from day to day is rather unsettling to the small-crop theory. The chief excuse for the break from 73%c to 71%c had, however, nothing in common with the Northwestern movement. It was tight money in New York that did it. Reports from there in quick succession quoted call money 10 per cent., 15 per cent., 20 and 50 per cent. bid, and wheat was offered for sale in large quantities with the invariable result. Notwithstanding the 50-per-cent. rate for money in New York the strength of the foregoing cables at the close was of the foregoing cables at the close was

that buying again became general, and another jump to 721/2c resulted. A return of the money scare seized the crowd again, however, and another reaction to 71% took place. The latest trading was at that figure. Business in corn was very quiet, the activity of wheat absorbing the interest of traders. The advance in wheat and firm cables were helping influences, but liberal Western offerings prevented much advance. May ranged from 28\4@28\%c to 28\%c, opening about \%c higher at 28\4@28\%c

28%c, and closed easy at 251/4 @28%c. Oots were quiet, with prices firm ariy, but reacted later and closed with a slight loss at the close. Fluctuations were confined to a narrow range and innearly every case, been cut to 40 cents per foot, and at those figures the oil well contractors will not wear out their tools.

The cause of the cut in drilling is laid to the door of the Standard Oil Company, but fluence and caused a slight decline soon after the opening. This was recovered later in sympathy with the advance in among the oil operators to push the drill. The Indiana oil field is fully as good as any other field yet developed, and the wells cost less money than in Ohio or in the 165 cars; corn, 580 cars; oats, 365 cars; hogs,

Cloudy and Threatening Weather, and Possibly Rain During Day. Forecasts for Indianapolis and vicinity for the thirty-six hours ending 8 p. m. Oct. 30-Cloudy and threatening and occasional rain on Friday. Colder by evening, and much colder Friday night; strong winds; will

probably moderate. General Conditions Yesterday-The storm area, covering the country from Minnesota and the upper lakes southward to the gulf, street, girl. increasing in energy, moved slowly, with its center, 29.42 inches, in central Iowa. As the high pressure near the Atlantic coast is diminishing rapidly, the storm area will probably move across the lakes northeast-ward. The warm current in its front ex-tends northward, with 70 degrees, to In-diana, Ohio and western Pennsylvania, and with 60 to Canada, in its rear. West of the Mississippi the temperature is quite low, freezing from Nebraska northward. Local rains fell everywhere except near the At-lantic coast, near the lower lakes and near the Rocky mountains. Heavy rains fell, 1.74 Richard W street, \$1,400
